Community Palliative Care Resources Pharmacy Pack

Community pharmacists play an important role in supporting families and carers who are providing care for a person with a life-limiting illness at home.

The new caring@home Community Palliative Care Resources Pharmacy Pack can assist pharmacists to support:

- families and carers in providing practical care, physical symptom management and subcutaneous medicine management for a person at home
- timely ordering and stocking of medicines from the National Core Community Palliative Care Medicines List.

Familiarise yourself with the factsheets, tip sheets, and step-by-step guides and keep them as a master set.

Download or print additional copies as needed.

Provide a copy of relevant resources to families or carers when needed.

Advise families and carers to follow clinical guidance and consult with their healthcare providers.
